

UPPER GLACIAL AQUIFER

MAGOTHY AQUIFER

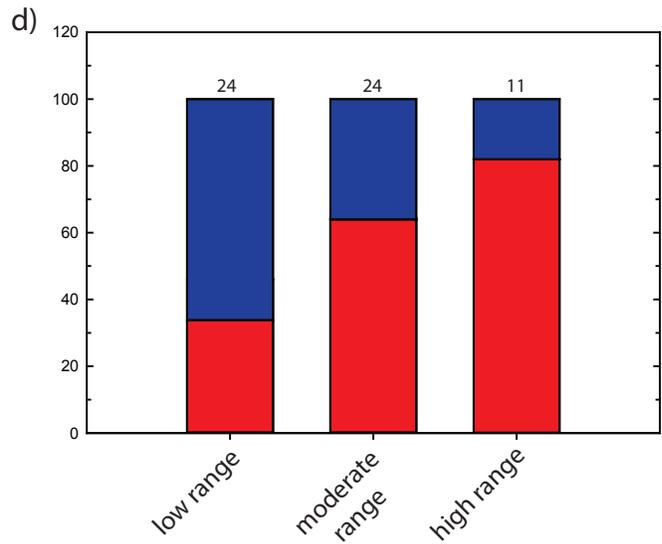

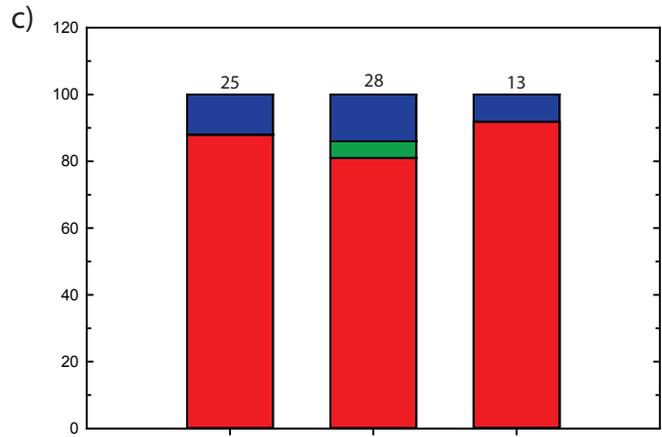

Figure 4: Division of wells based on representative nitrate concentration value for upper glacial aquifer a) long term and b) short term, and Magothy aquifer c) long term and d) short term. low range = less than or equal to 1 mg/L; moderate range = greater than 1 mg/L to less than or equal to five 5 mg/L; high range = greater than 5 mg/L. (Analysis includes both censored and uncensored results).
