

## PREFACE

This volume of the annual hydrologic data report of New York is one of a series of annual reports that document hydrologic data gathered from the U. S. Geological Survey's surface- and ground-water data-collection networks in each State, Puerto Rico, and the Trust Territories. These records of streamflow, ground-water levels, and water quality provide the hydrologic information needed by state, local, and federal agencies, and the private sector for developing and managing our Nation's land and water resources. Hydrologic data for New York are contained in three volumes:

Volume 1. Eastern New York excluding Long Island

Volume 2. Long Island

Volume 3. Western New York

In addition to the authors, who had primary responsibility for assuring that the information contained herein is accurate, complete, and adheres to Geological Survey policy and established guidelines, the following individuals contributed significantly to the collection, processing, and tabulation of the data:

M. D. Corse  
V. M. DeVolder  
J. A. Gardner II  
C. L. Gazoorian  
G. J. Hebert

M. E. Hendricks  
T. F. Hoffman  
R. Lumia  
E. A. Nystrom  
A. M. Gearwar

K. D. Reisig  
T. P. Suro  
J. F. Weigel  
B. J. Zatorsky

This report was prepared in cooperation with the State of New York and with other agencies under the general supervision of R. W. Rodriguez, District Chief, New York.
