The following continuous-record surface-water discharge or stage-only stations (gaging stations) in central and western New York have been discontinued. Daily streamflow or stage records were collected and published for the period of record, expressed in water years, shown for each station. Those stations with an asterisk (\*) after the station number are currently operated as crest-stage partial-record station and those with a double asterisk (\*\*) after the station name had revisions published after the site was discontinued. Those stations with a (‡) following the Period of Record have no winter record.

*[Letters after station name designate type of data collected: (d) discharge, (e) elevation, (g) gage height]*
